Association of Energy Engineers

AEE is a non-profit organization committed to serving our members and other industry professionals who are working to improve energy efficiency in order to save energy, reduce greenhouse gas emissions, improve the performance of buildings, and contribute to achieving global Net-Zero goals.

LEARNING OBJECTIVES

- ✓ Association of Energy Engineers
- ✓ Who are CMVP Professionals?
- ✓ What Does a CMVP Do?
- ✓ Certified Measurement & Verification Professional® - CMVP®

Association of Energy Engineers

- The nonprofit Association of Energy Engineers (AEE) has 17,000 members in 100 countries.
- AEE works "to promote the scientific and educational interests of those engaged in the energy industry and to foster action for sustainable development." AEE offers conferences, journals, books, training, and certification programs.
- AEE's 100 local chapters discuss regional issues. AEE's corporate members are a "who's who" of commercial, industrial, institutional, governmental, energy services, and utility companies.

Certified Measurement & Verification Professional® – CMVP®

A Certified Measurement & Verification Professional (CMVP®) is an individual who applies the concepts of measurement and verification to determine the performance improvement resulting from energy management activities within a wide range of energy consuming systems, such as building systems or industrial processes.

- The Association of Energy Engineers has established the Certified Measurement and Verification Professional® program with the dual purpose of recognizing the most qualified professionals in this growing area of the energy industry, and raising the overall professional standards within the measurement and verification field.

Who are Certified Measurement & Verification Professionals?

- Are you an energy manager looking to validate your energy savings?
- You specialize in the energy performance of your clients' buildings and facilities as a consultant.
- Are you a building owner or manager interested in learning how energy savings can fund your next project?
- Are you responsible for designing industrial processes or new structures?

What Does a CMVP Do?

- A Certified Measurement & Verification Professional® (CMVP®) manages or executes internationally recognized methods for quantifying the energy usage impacts of energy management activities.
- They implement the fundamental concepts of performance and savings verification in a variety of contexts, such as energy savings performance contracts and utility/government incentive programs.
- Through transparent communication with project partners, a CMVP® can frequently assist a business in confidently and cost-effectively implementing cost-saving activities.
