- Engineers who are working in LEED / GSAS / IGBC projects and wants to understand more about Commissioning Requirements and Implementation.
- Learners will get the knowledge required to understand basic information about Building Commissioning Services
- Who want to know advanced information about Green Building, Building Commissioning, Sustainability and their verification tool which is LEED or GSAS or IGBC Rating System .

Dr. Malcolm Lewis

IN MEMORY OF DR.MALCOLM LEWIS"67

Well known for his expertise in the design of sustainable buildings, **Lewis** was active in the development of the Leadership in Energy and Environmental Design (LEED) green building rating system. He served as a board member of the U.S. Green Building Council from 1997 to 2002, as chairman of the (LEED) Technical and Scientific Advisory Committee from 2001 to 2009, and as chairman of the LEED Technical Committee.

"I love working with buildings," Lewis said at the start of the Enhanced Commissioning training for Dubai project in July 2008.

"They are very tangible, almost everyone lives and works in them, they consume a huge fraction of our energy and natural resources, and they last for a very long time. So it is important to make good decisions before they are built."

THE CXA PROCESS COURSE OUTLINE

- Define the Commissioning Process
- Who can be the Commissioning Provider
- Costs and Benefits of Commissioning
