BUILDING COMMISSIONING PROFESSIONAL

CBCP OVERVIEW

Certifications are essential for work market commissioning experts and managers since they demonstrate experience, increase earnings, and establish trust in the business. They also exhibit a commitment to providing high-quality service and being up to date on new technologies.

Learning Objectives

- Course Overview and Introduction
- Definition and History of Building Commissioning
- Why is building commissioning needed?
- Building Commissioning Process Overview
- Professional Certification in Commissioning
- Cost and benefits of building commissioning
- Summary and Resources
- CBCP Sample Exam Question

BEYOND SMART CITIES

INTRODUCTION

- Equips engineers with knowledge and skills for correct commissioning of technical systems.
- Responsibilities include testing, troubleshooting, and confirming system functionality.
- Covers topics like safety protocols, electrical theory, system design principles, troubleshooting techniques, and system installation procedures.
- Provides guidance on documenting results and generating performance metric reports.
- Requires thorough review of credentials, experience, and industry regulations.

COMMISSIONING TEAM ROLE IN CONSTRUCTION

- The commissioning team comprises various stakeholders during the construction process.
- Each project has a commissioning provider who manages and plans all commissioning activities.
- The team includes a Cx provider, client representative, architect, MEP designers, and contractors.
- The commissioning organization is adapted according to the complexity and quality expectations of the project.

COMMISSIONING TEAM ROLE IN CONSTRUCTION +

- Other stakeholders like green building consultants and manufacturers of critical components may also participate.
- The commissioning provider can be the client's, designer's, or contractor's representative or an independent third party company.
- The best approach depends on the complexity, type, and size of the project.
- For projects seeking LEED certification, the independent third party Cx provider is mandatory.

BEYOND SMART CITIES

COMMISSIONING PROVIDER SKILLS REQUIREMENT

- Maintains unbiased problem-solving and conflict resolution approach.
- Knowledge of HVAC systems, including design, control strategies, installation, operations, and maintenance.
- Experience in HVAC controls, including current technology.
- Practical background in field construction.
- Ability to organize specific activities into a coherent commissioning plan.
- Good communication skills, documentation proficiency.
