- Summary and Resources

BEYOND SMART CITIES

SUMMARY

- WELL AP certification signifies proficiency in the WELL Building Standard and dedication to improving human health and well-being in buildings and communities.
- WELL APs are masters of the WELL Building Standard and core components of people-first design.
- WELL APs maintain their credentials by obtaining and reporting continuing education (CE) hours.
- The WELL Accredited Professional Overview training was developed by Krishnaji Pawar, a green building specialist specializing in sustainable design strategies, environmental impact assessment, green building certification systems, energy modeling, and environmental management systems.

SUMMARY +

- Learning Objectives include understanding WELL Credentialing Process, Basic Concepts of Sustainable Design, Organizational Fundamentals, WELL Building Standard, Advantages of WELL Certification, and Obtaining WELL Accredited Professional Credential.
- IWBI aims to transform buildings and organizations to promote health and well-being, based on the WELL Building Standard.
- Sustainable development includes energy, urban management, natural ecosystems, economic development, social fairness, policy integration, and the belief that successful solutions can be reached cooperatively.

SUMMARY +

Green Building Services

- Beyond Smart Cities offers green building services to help businesses achieve environmentally responsible objectives.
- These services reduce energy consumption, manage costs, minimize environmental impacts, and ensure worker health and safety.
