About LEED AP (BD+C)

LEED AP BD+C credential

Roles and Responsibilities of LEED AP

ABOUT LEED PROFESSIONAL CREDENTIALS

A LEED credential denotes proficiency in today's sustainable design, construction and operations standards. More than 203,000 professionals have earned a LEED credential to help advance their careers. Showcase your knowledge, experience and credibility in the green building marketplace as a LEED professional.

LEED Green Associate - LEED GA

A foundational professional credential signifying core competency in green building principles. The exam measures general knowledge of green building practices and how to support others working on LEED projects and is ideal for those new to green building.

LEED AP with specialty

An advanced professional credential signifying expertise in green building and a LEED rating system. To earn a LEED AP with specialty, candidates must first pass the LEED Green Associate exam. The exams measure knowledge about green building, a specific LEED rating system and the certification process and are ideal for individuals who are actively working on green building and LEED projects

LEED AP ROLES & RESPONSIBILITIES

Strategy Development - Develop actionable strategies that fit their LEED goals and responsibilities.

Reporting Environmental Data

Energy Efficiency and Facilities Management

Develop LEED Certification Management Plan and Implement During Detailed Design & Construction Supervision.

Develop & Implement LEED Project Manual During Construction Supervision

Leading a Cross-functional Committee

LEED Certification Documentation

WHY WOULD I NEED A GREEN BUILDING CONSULTANT ?

A green building consultant specializes in sustainable design and LEED certified projects. They may also have expertise in other green building rating systems and Energy Star.

Facilitate early design "Eco-Charrette(s)" establish sustainability goals

Establish Owners Project Requirements / Basis of Design documentation

LEED Project registration- An on line process to register the project with GBCI and gain access to the credit templates and complete certification process.

Specification review and assistance /Design Consulting

LEED Certification Documentation -This is an on line process that the entire project team will need to participate in. It is important that the effort be led by someone who has experience.

Public Relations and marketing support for LEED projects
