WHAT IS ISO 45001:2018 – OHSMS?

The International Labour Organization (ILO) estimates that every year, around 2.3 million workers around the world die from work-related accidents. According to ILO, every year, worldwide, there are around 340 million occupational accidents and around 160 million are victims to work-related illnesses. While in the past decades, great efforts were made to improve the health and safety of workers, there is still a lot that must be done.

ISO 45001 is an international standard that specifies requirements for an Occupational Health and Safety (OH&S) management system, which is intended to improve the safety and health of both employees and other personnel. ISO 45001 helps provide new impetus for occupational health and safety practices in organisations and also helps to improve safety for employees and contractors.

To tackle the issues related to the health and safety of workers, ISO has developed ISO 45001, an international standard that defines the requirements for an occupational health and safety management system (OH&S MS).

An Occupational Health and Safety Management System (OHSMS) is a fundamental part of an organisation's risk management strategy.

WHY IS OH&S MS IMPORTANT FOR YOU?

Due to the high number of occupational accidents and deaths, better and more effective practices which guarantee the health and safety of workers in the workplace is a necessity. To mitigate the risk and hazards in the workplace, organizations must prioritize the health and safety of their employees.

Organizations and individuals operating in any industry must collaborate to achieve the same goal, which is to reduce as much as possible the number of accidents that lead to injury or health-related issues.

Attending a Beyond Smart Cities 45001 training course, be it Foundation, Lead Auditor, or Lead Implementer, will enable you to comprehend internationally recognized practices that are intended to improve the working conditions and guarantee the well-being of employees

ISO 45001 OHSMS FRAMEWORK

At the highest level, ISO 45001:2018 covers the following topics with regard to (OH&S) management system:

- ✓ Context of the organization
- ✓ Leadership
- ✓ Planning
- ✓ Support
- ✓ Operation
- ✓ Performance evaluation
- ✓ Improvement

BENEFITS OF ISO 45001 FOR ORGANIZATIONS

An effective OH&S MS based on ISO 45001 has the potential to shape and improve an organization's way of working and can make the workplace a safer and better place. Some of the benefits that organizations would gain by implementing an OHSMS based on ISO 45001 include, but are not limited to:

- ✓ Enhanced reputation among internationally recognized businesses as a result of implementing the best practices of occupational health and safety
- ✓ Increased trust of employees by demonstrating that the organization is committed to improve their safety and health in the workplace
- ✓ Increased return on investment due to improved staff productivity, while the injuries within the workplace will be reduced
- ✓ Reduced employee turnover because the main focus will be in the mental and physical well-being of the employees
- ✓ Reduced insurance premiums and claims
