ENVIRONMENTAL SPECIALIST CURRICULUM

LEARNING OBJECTIVES
The training program, conducted by Beyond Smart Cities's experienced instructors, helps in increasing the participants' awareness with regards to both the national and international norms and regulations relating to Occupational Health & Safety (OH&S) requirements
Comprehend the roles and responsibilities of an auditor: Plan, Conduct, reporting and follow
This comprehensive course provides hands-on training to ensure that each participant thoroughly understands the role and acquires the requisite expertise needed or required to perform the audit effectively

KEY TAKEAWAYS

- On course completion you will be awarded with our internationally accepted ISO 45001 Occupational Health & Safety (OH&S) Management Systems Training Certificate
- Understand the audit requirements and principles and practices of auditing
- Add a new impetus for occupational health and safety practices in your organisation
- Improve health and safety of employees and contractors
- Stand out from your competitors and exhibit your auditing skills to attract better job opportunities.

CAREER BENEFITS

- Acquire the necessary skills needed to lead an ISO 45001 audit team and conduct first, second and third-party audits against the standard requirements and in accordance with ISO 19011:2018 and ISO/IEC 17021-1:2015, as applicable
- Increases your awareness on improving the efficiency of internal operations and the quality of manufacturing processes
- Improves safety practices of all affected by the organisation's activities
- Transforms your operations from detection mode to prevention mode

WHY IS OH&S MS IMPORTANT FOR YOU?

- Due to the high number of occupational accidents and deaths, better and more effective practices which guarantee the health and safety of workers in the workplace is a necessity. To mitigate the risk and hazards in the workplace, organizations must prioritize the health and safety of their employees.
- With statistics for health and safety incidents begin reported daily around the globe it became clear that there was a need to harmonize health and safety management systems using an international standard.
- This standard was also created to align with popular management systems, such as ISO 9001 and ISO 14001, through the Annex SL framework. This enables effective adoption of multiple standards to meet an organization's specific requirements.

BENEFITS OF ISO 45001 FOR ORGANIZATIONS

An effective OH&S MS based on ISO 45001 has the potential to shape and improve an organization's way of working and can make the workplace a safer and better place.Some of the benefits that organizations would gain by implementing an OHSMS based on ISO 45001 include, but are not limited to:

- ☑Enhanced reputation among internationally recognized businesses as a result of implementing the best practices of occupational health and safety
- ☑Increased trust of employees by demonstrating that the organization is committed to improve their safety and health in the workplace
- ☑Increased return on investment due to improved staff productivity, while the injuries within the workplace will be reduced
- ☑Reduced employee turnover because the main focus will be in the mental and physical well-being of the employees
- ☑Reduced insurance premiums and claims
